HORÁCIO FLÁVIO COMÉ JÚNIOR

SENIOR ANDROID ENGINEER

Belmonte, Portugal | +351 915 071 108 | mail@horacioco.me | horacioco.me

PROFILE

Senior Android Engineer building production applications since 2018 across retail analytics and fintech. Specializes in Kotlin, Android architecture, reliable local data, and complex device workflows. Hands-on technical owner who also mentors and unblocks engineers.

TECHNICAL SKILLS

Android Kotlin, Java, Android SDK, Jetpack Compose, Coroutines, Flow/StateFlow, ViewModel, CameraX

Architecture & data MVVM, repositories, Room/SQLite, multi-database design, Retrofit, Gson, Hilt, Koin

Delivery & testing JUnit, MockK, CI/CD, Git, Bitbucket, GitHub, Google Play Console, Jira

Additional Kotlin Multiplatform (KMP), Ktor, PostgreSQL

PROFESSIONAL EXPERIENCE

Johnson Controls / Sensormatic | Senior Software Engineer

Jan 2024 – Present • Portugal

- Technical owner of native Android development for TrueVUE Cloud Analytics, helping migrate from Xamarin to Kotlin and shape engineering standards with other developers.
- Independently redesigned a data-intensive, multi-database persistence and synchronization layer, replacing an implementation affected by cross-instance race conditions, failed or hung transactions, and inconsistent data.
- Led the database/synchronization refactor that unblocked end-to-end testing after about 12 months; also fixed a long-standing resource leak.
- Designed and owned app lifecycle management, custom application events, and background processing while collaborating on broader Android architecture.
- Delivered about 90 of 100 legacy-to-native functionality changes in FY25, advancing feature parity and release readiness.
- Improved maintainability and release reliability through MVVM refactoring, code standards, release-build validation, and security-aware build and API-key handling.
- Resolved Cycle Count performance issues and complex device bugs; supported native Android build validation and release readiness.
- Mentored and onboarded engineers through code reviews and collaborative debugging, coordinating technical delivery across internal and partner teams.

WIT Software | Software Engineer

Aug 2021 – Dec 2023 • Coimbra, Portugal

- Built Android features for M-Pesa mobile products serving over 2 million users, including eKYC, device management, and loan applications.
- Implemented Kotlin/Java features with MVVM, repositories, Coroutines, networking, and local persistence in large-scale fintech systems.

Advanced Intelligent Systems | Commissioning Specialist

Dec 2019 – Jul 2021 • Maputo, Mozambique

Plings | Software Developer

Oct 2018 – Oct 2019 • Maputo, Mozambique

EDUCATION

Universidade A Politécnica | BSc, Computer and Telecommunications Engineering

Mar 2016 – Jun 2019 • Maputo, Mozambique
